Bird on the Rocks produces one of the finest climbing net play gyms you will ever find. We take much time wrapping rope and tying knots to our exact standards. These nets will make a playground that will keep your bird busy for hours on end.

Macaw 22oz Feeder Bowl

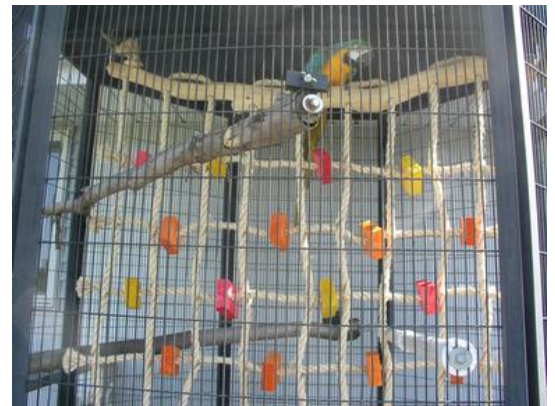

\$29.99

Made from the finest materials, no chemicals or oils are on or in the Sisal rope we use and our Manzanita top bar will ensure you have a durable perch for your FID to rest on from all their hard play. The Sisal rope can easily be replaced when or if it ever is needed.

You will enjoy watching your birds' antics as much as your feathered friend likes playing on it.

Lugged large 22oz feeder bowl. Mounts to tree stands or to BOPR climbing net play stands. [\[Product Details...\]](#)

The Climbing Net comes with stainless steel hooks on both ends and two, 2 foot sections of 4mm Nickel plated chain to hang it from. There are some that use a "drift wood" top perch. Don't be fooled. No one knows where that perch has been or what type of wood it is. Don't let your bird chew on something that is potentially hazardous to it's health. Buy the BEST, get a BIRD on the ROCKS NET!

"Just wanted to tell you that this is my second purchase of the same large rope gym. I bought one last year and my greenwinged macaw lives on it. She loves it. She chewed through the perch. Getting another for her and one for the amazons and grey. Thanks for such a great product."
